

Norton Mobile Security

 iOS

Choose to be safer online.

It's more important than ever to make sure your mobile devices are secure and your personal information stays private.

Norton Mobile Security helps protect against viruses, ransomware, malware, and other online threats as you bank, browse and shop online.

It also checks for the latest security patches and OS updates. And, it monitors for vulnerabilities and cyberattacks that attempt to leverage OS vulnerabilities for malicious purposes.

Your subscription will continue without interruption. You'll get an email before renewal. Cancel the renewal at any time before your billing date.

Sign up and Activate Online. Credit/debit card or PayPal required for activation and use.¹ See back of card for complete details.

Powerful protection for your mobile device and the personal information it stores.

Features

App Advisor¹

Proactively helps protect your smartphone against mobile threats like malware, ransomware, adware, and privacy leaks using our award-winning, patent-protected app scanning technology.

Wi-Fi Security

helps detect and alert you when a network you join is dangerous or under attack to help protect your personal and financial information.

Web Protection

helps detect and safeguard you from navigation to fraudulent and malicious websites when using your preferred browser, app, SMS, MMS, Email, and social networking sites.

Device Security

lets you know when your operating system has vulnerabilities, so you can take action to help protect your device against cybercriminals that could take control of it or steal your personal information.

SMS Security²

These attacks use links to fraudulent sites that compromise your personal information.

System Requirements

See <https://www.norton.com/sysreq> for the most up-to-date system requirements.

1. App Advisor feature is available on Android only.

2. iMessage not supported.

No one can prevent all cybercrime or prevent all identity theft.
